

# Resume — AI Engineer

## Professional Summary

Results-driven AI Engineer experienced in building scalable machine learning systems, LLM-based applications, and computer vision pipelines. Focused on rapid prototyping and production deployment for AI-powered solutions.

## Technical Skills

Machine Learning	Deep Learning	Neural Networks
Python	TensorFlow	PyTorch
OpenAI APIs	LangChain	LLMs
Computer Vision	NLP	Data Preprocessing
Docker	Git	MLOps Basics

## Projects

- AI Workflow Agent – Automated repetitive workflows using an LLM-powered decision system.
- Vision Attendance System – Face recognition model with 92% accuracy built using CNNs.
- ChatGPT-style Bot – Built using GPT APIs + memory & retrieval augmentation.

## Work Experience

### AI Intern — IHX Private Limited (3 Months)

Contributed to data automation systems, assisted in training ML models, and optimized preprocessing pipelines.

## Education

B.Tech – Artificial Intelligence & Machine Learning
